

Who takes precautions to keep themselves safe?

MEN AND BOYS ONLY On a night out, what have you done/would you seriously consider doing in order to avoid being sexually assaulted?

WOMEN, GIRLS AND NON-BINARY ONLY On a night out, what have you done/would you seriously consider doing in order to avoid being sexually assaulted??

Women, girls and non-binary people are more likely to take *some* precautions than men/boys (90% vs 75%) and more than twice as likely to take most of the precautions listed
